EXPERIENCE

Software Developer   2024 – Present
CNB Logistics Tech   *Mumbai, India*

- **Smart Transport Platform** *(Container tracking system for trip-based driver operations)*
  * Took ownership of full system (Webapp + Mobile app) after team transition, leading end-to-end development
  * Implemented RBAC (Role-Based Access Control) and designed operational workflows
  * Developed OCR-based container scanning workflow and enabled OTA updates in driver mobile application, eliminating manual installations
  * Supported live deployments, client onboarding, and operational troubleshooting for real-world logistics systems
- **Smart TOS System** *(Terminal Operating System for managing CFS logistics operations)*
  * Developed Advanced Filter v2 and dynamic form builder for scalable module configuration
  * Built reusable UI components including tables, pagination systems, accordion layouts using Angular
- **Coil Scan Mobile Application** *(QR-based coil tracking and storage workflow system)*
  * Built QR-based scanning workflow for industrial coil tracking with validation and structured UI display
  * Developed end-to-end mobile workflows including scan, submission, error handling, and confirmation flows
- **Field Operations & Client Interaction** *(On-ground visits to CFS yards including Aqdas and Globicon)*
  * Conducted field visits to understand logistics workflows and translated insights into system improvements
  * Led onboarding, training sessions, and provided continuous support for transport operators and client teams
  * Collaborated with stakeholders and field operators to identify system gaps and improve workflow efficiency

Software Development Intern (Node.js)   Aug 2023 – May 2024
Software Solution Inc.

- Worked on bid automation logic and backend workflows for real-time auction system
- Contributed to development and maintenance of BankAuctionOnline platform

PROJECTS

Shikalgar Jamat Trust Platform (NGO Initiative) *(Social Impact)* | *Next.js, Tailwind CSS* | Live — shikalgarjamat.com
- Led development of official NGO platform to enable digital presence, fundraising, and community outreach
- Driving digital compliance initiatives including 12A, 80G, NGO Darpan, and CSR registration
- Building systems to support education and financial aid for underprivileged students

TinyDesign Architecture Website | *Next.js 14, TypeScript, Sanity CMS* | Live — tinydesign.in
- Developed full-stack architecture studio website using Next.js 14 with ISR(60 sec) and React Server Components
- Integrated Sanity CMS with dynamic routing for portfolio and content management

EDUCATION

Mumbai University   Mumbai, India
Bachelor of Engineering in Computer Engineering (CGPA: 9.3)   *2019 – 2023*

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java
Frontend: React.js, Next.js, Angular, Tailwind CSS
Backend: Node.js, REST APIs, Basic Express, Spring Boot
Mobile & Integrations: Ionic, React Native, OCR, QR Scanning, OTA Updates
Tools & Platforms: Git, Vercel, Google Cloud, Postman

CERTIFICATIONS

Generative AI Intensive Program – Google (Kaggle, 2025)

Full-Stack Web Development with React – Coursera
